

August 7, 2009

Colton's Steakhouse and Grill in Searcy, AR has been a Detco customer for over 2 years. We use the ShurFloor and the Ovec cleaning products. The ShurFloor is a floor cleaning solution used when mopping our floors. It really cuts the grease and odor down from the daily buildup. The Ovec is a heat activated cleaning solution that we use in cleaning ovens, burners, and other char collecting items in our kitchen.

Both of these products are great items. I found the Shurfloor over two years ago when I was trying to cut down on grease buildup on my floors. All other products I had tried could not cut the grease like this product. I have been using the Ovec for over a year now. The sales lady came in and wanted to show me how it worked. I kind of took her for granted and told her I would give it a shot, but I probably wasn't going to be interested. She fooled me. She sprayed 5 times on the inside of my oven door and let it sit for about 15 seconds. It started to eat away at the hard buildup.

I think people take cleaning sales people for granted, but without them we could not keep our store as clean and updated as we do. When Detco has a product for our problem, it's a solution.
